

DealProof

Score what you can prove. One app for reps to run deals and managers to inspect them.

Challenger selling motion · MEDDPICC evidence backbone · Equinix Interconnection & Fabric

What it is. DealProof turns deal reviews from opinion into evidence. Every deal is scored 0–3 on the eight MEDDPICC letters — Metrics, Economic Buyer, Decision Criteria, Decision Process, Paper Process, Identify Pain, Champion, Competition. Health, forecast gates and coaching actions all derive from those scores, so a deal is only as strong as what you can prove. Around the scorecard sits a full Challenger toolkit for the Equinix Fabric sale: teaching-led discovery questions, objection reframes and insight-first email templates. Everything autosaves as you work, so the scorecard is always ready for the next call or deal review.

THE SCORING SCALE — PER LETTER

- 0 Unknown.** Nobody has asked yet.
- 1 Assumed.** We believe it; no source.
- 2 Told to us.** The customer said it.
- 3 Verified.** Written, tested evidence.

REP Run your deals

- 01 Playbook**
— the operating model: the commercial reframe, Teach / Tailor / Take Control, and where each letter gets earned.
- 02 Pipeline**
— every deal with health ring, letter strip, forecast gate, momentum and staleness. Click a card to open it.
- 03 Deal Room**
— score the 8 letters against evidence anchors, attach notes, and watch health, radar and next-best-action react live. Copy a markdown brief for CRM or Slack.
- 04 Discovery Bank**
— 24 questions that teach while they qualify, filterable by letter, with "listen for" cues and per-deal asked-tracking.
- 05 Objection Tracks**
— 8 objections, each with the vendor trap and the Challenger reframe. Copy and make it yours.
- 06 Email Templates**
— 5 insight-led emails (cold reframe, EB access, mobilizer, renewal leverage, re-engage) with highlighted placeholders.

MANAGER Inspect & coach

- 01 Team Command**
— pipeline vs. evidence-weighted pipeline, commit-ready and at-risk counts, and the deals × letters heatmap. The darkest column is your team's skill gap.
- 02 Deal Inspect**
— run the five review questions against any deal's live scorecard, see where it dies today, and log one coaching action per review.
- 03 Coaching Guide**
— the 15-minute deal review, forecast gates and manager operating rules. Inspect evidence, not enthusiasm.

Pipeline

IP ≥ 1

Pain identified; reframe acknowledged by the customer.

Best case

M · CH · DC
≥ 2

Their numbers, an active champion, influenced criteria.

Commit

EB · DP · PP
≥ 2 + health

EB engaged, processes verified in writing, health over threshold.

GETTING STARTED — 60 SECONDS

- 1 Open DealProof**
A short guided tour walks you through the app the first time you open it.
- 2 Pick your workspace**
Toggle Rep / Manager top-right (or press **R**). Demo deals are pre-loaded to explore.
- 3 Score a deal**
Open the Deal Room, click 0–3 on each letter, add the evidence behind the score.
- 4 Work the gaps**
Anything at 0–1 lands in the gap plan with a coaching action — that's your next-call agenda.
- 5 Review weekly**
Managers: open the heatmap, pick the worst row, run the five questions, log one action.

Shortcuts **1–6** sections · **R** switch workspace · **⌘K** search anything · **N** new deal · **?** help

Your data Autosaves as you work and stays private to you. Back it up or move it between machines via Settings → Export / Import. Reset demo data anytime.
